Crews Respond to Power Outage

TILLAMOOK, OR – January 9, 2008- Tillamook PUD customers located in Netarts and Oceanside, the Pleasant Valley area and in some areas south of Les Schwab in Tillamook lost power on Tuesday, January 8, at about 5:00 p.m.

Crews responded immediately and began the process to locate the problem and determine a cause. Upon determining that no equipment had failed, nor had there been an auto accident, crews concluded a tree limb had fallen into a line and caused the outage.

Crews began restoring power in sequence on the feeder line from the Trask River substation. Power was restored to residents in the Pleasant Valley area at 7:10 p.m.; from the Netarts Hwy to Oceanside at 8:05 p.m.; and all areas were fully restored at 8:25p.m.

Approximately 2,500 customers were affected.
